## Physics BA/Minor 2017-2018 Student Learning Outcomes

Outcome		Assessment Methods
1	Students will demonstrate basic conceptual questions understanding of, for example, special relativity, wave-particle duality, properties of quantum mechanical wave functions, and limitations of classical physics.	Midterm exam Final exam
2	Students will apply their numerical and computational skills to solve problems involving, for example, electricity, waves, optics, and spectroscopy.	Homework assignments/projects Final exam
3	Students will perform an advanced experimental project and data analysis, including, for example, distinguishing statistical and systematic errors, propagating errors, and representing data graphically.	Formal project report Oral presentation of project
