

Accountancy MS
2018-2019 Student Learning Outcomes

Outcome	Assessment Methods
1 <i>Students will build upon their undergraduate preparation to expand their technical and theoretical knowledge of the functional areas of accountancy.</i>	<i>Written assignments</i> <i>Fall thesis evaluated with rubric</i>
2 <i>Students develop specialized technical skills and acquire knowledge that prepare them for careers in auditing, taxation, financial reporting, government, managerial accounting, and financial services.</i>	<i>Spring thesis evaluated with rubric</i>
3 <i>Our students understand the implications and importance of ethical behavior through (a) the identification of ethical dilemmas in the context of accounting and its stakeholders and (b) the application of appropriate authoritative literature, codes of conduct and ethical reasoning to address problems facing accounting professionals, with emphasis on one's intended area of practice.</i>	<i>Fall thesis evaluated with rubric</i>
