*The one (1) simple assault bias type was sexual orientation.

Crime statistics within this rubric are collected from official reports filed with law enforcement and disclosures made to Campus Security Authorities (CSAs). Some victims/survivors elected not to file an official report with law enforcement but instead disclosed to a Campus Security Authority and/or sought assistance from campus resources such as Office of Victim Services, etc.

Daily Crime Log

The Campus Police Records Unit serves as archivist for all incident reports filed within the jurisdiction of the College's Campus Police. A request for an incident/accident report should be made to the Records Clerk located at Campus Police Headquarters or through email at PSrecords@cofc.edu. Requests may be submitted from 8 am - 3 pm, Monday through Friday. Processing of reports once a request has been submitted takes approximately three business days. A daily log which is a listing of all crimes reported to Campus Police is available for public viewing. An update of the log is completed within two business days of the filing of an initial report except where disclosure of such information is prohibited by law; such disclosure would jeopardize the confidentiality of the victim; and/or release of such information would jeopardize any component of an ongoing criminal investigation.

Emergency Response, Evacuation and Emergency Procedures

College of Charleston Emergency System

The College of Charleston's Emergency Alert mass notification system is used to immediately notify the campus community upon confirmation of a significant emergency or dangerous situation involving an immediate threat to the health or safety of students or employees occurring on or near campus. This confirmation will be based on the judgment of, and verification by, any member of the Emergency Management Decisional Authority Team from information received from the College of Charleston Emergency Management Team, Charleston County Emergency Management, mutual aid incident command, college incident command, or federal or state agencies. As defined by the Jeanne Clery Disclosure of Campus Security Police and Campus Crime Statistics Act, 34 CFR 668.46 (g) "immediate" threats include imminent or impending situations such as, but not limited to:

- Bomb threats or explosions, or other threats of imminent violence
- Fires, hazardous chemical or waste spills or gas leaks
- Terrorism incident or threat, including biological threats
- Infectious disease incident
- Natural disasters including hurricanes, earthquakes, tornadoes, floods, etc.
- Power outages or utility failures resulting in an imminent safety or security threat
- Campus closure due to weather or declared civil emergency

Use of the Cougar Alert System

The College of Charleston Emergency Alert mass notification system operates under the supervision of the chief of campus police and members of the Emergency Management Decisional Authority Team. The Department of Public Safety will consult with the Office of the President if circumstances allow, before sending an alert or advisory. During the early phases of an emergency, the chief of campus police or the highest-ranking public safety officer on campus at the time of the emergency, will be charged with determining the type of alert needed. The Department of Public Safety will notify University Communications of the incident and University Communications will be responsible for composing and sending critical messages to the campus community. University Communications will continue to send further critical messages to the campus community until the emergency is over. University Communications will post the information at <https://emergency.cofc.edu>, and, if warranted, record the information on the emergency information hotline at 843.725.7246.

There are three levels of notifications:

- **Cougar Alert** - Cougar Alerts are reserved for major emergencies or life-threatening situations occurring on or near campus. Types of emergencies that warrant the issuance of a Cougar Alert include active shooter, assault and homicide.
- **Campus Advisory** - Campus Advisories are intended to provide information about events or ongoing issues occurring on campus that warrant notification of the campus community but that do not pose an immediate danger to health and safety. Examples include case updates on ongoing public health matters (e.g., mumps, COVID-19), facilities-related issues affecting large numbers of people (e.g., parking garage problems), isolated gas leaks and fire alarms and other incidents that do not meet the level of a Cougar Alert emergency notification or Timely Warning notification.
- **Timely Warning Notices (Clery)** - A notification that is sent via campus email in response to crimes that pose a serious or continuing threat to students and/or employees, pursuant to the federal Jeanne Clery Act.

The Emergency Management Team will work with the Department of Public Safety on an ongoing basis to ensure appropriate officers are trained in the use of the **College of Charleston Emergency System**.

In situations of an expected emergency (examples include severe weather threats such as hurricanes or flooding), the Emergency Management Decisional Authority Team will determine when to activate the Emergency Management Team, the appropriate emergency response protocol, and send an alert or advisory. University Communications will be responsible for composing and sending initial and ongoing critical messages to the campus community (via phone call, text message and email), posting the information at <https://emergency.cofc.edu/> and on the emergency information hotline at 843.725.7246.

Determination of Notification to All or Part of the Campus

The Emergency Management Team and the Department of Public Safety will determine which specific segment(s) of the College community to alert where the potential danger and/or threat is limited to a particular building or segment of the population. If the Department of Public Safety determines through a continuing assessment of the situation that additional segments of the College community may be at risk, those segments may also be notified. In cases where circumstances threaten the operations of the College community as a whole, the entire campus community will be notified.

Tests of the Cougar Alert System

Tests were conducted in **2021 on March 25th, October 22nd and 23rd**. All tests had prior notifications in order to encourage the campus community to update contact information. A review of the data from the tests was presented at meetings of the Emergency Notifications Team offering opportunity to make changes and fine tune the system.

The emergency information page located at:

<https://emergency.cofc.edu/wp-content/uploads/2015/07/emergency-quick-reference.pdf> provides information relevant to fires, building evacuation procedures, suspicious packages, bomb threats, suspicious behavior/persons of concern, and active shooters. Training of Public Safety personnel and drills relevant to emergencies on campus are ongoing. Emergency evacuation of the residence halls are conducted throughout the year.

Tabletop Exercise

A tabletop exercise was held on July 16, 2021, at 86 Wentworth St. (CofC Jewish Studies Center) which had representation from Public Safety, Charleston Fire Department, and the FBI, A brief presentation on ter-

minology and IED recognition. Following the presentation, two scenarios were conducted. The first scenario was a full structure clear to cold where the team encountered multiple IED and injured parties, each of which were handled appropriately. The second scenario the team worked a hostage rescue scenario, followed by a full structure back clear. Following the second scenario the day was debriefed. College of Charleston Department of Public Safety (Command/Officers), Charleston Fire Department TEMS, and command were on scene as well as observers from the FBI.

Positives:

The scenarios were consistently evolving, which caused the need for individual operators to adapt, find work and overcome new challenges. Operators were able to grow their understanding of IED's, how they function and what means it takes to mitigate them. Operators were faced with several challenges through inability to communicate, and were able to work through the challenging large, multi-floor structure.

Areas for improvement:

Reduce numbers in hallway to improve team focus on tactical positioning when dealing with a large structure clear, by reducing numbers in the hallway. Consider using the "module" aspects of the kit to reduce weight. Consider using technology to push forward where IED's are present.

Corrective Action:

Pass the responsibility of medical completely to CFD TEMS when they are on scene. Focus on obtaining several training locations that have small hallways and multiple doors. Understand how tactics and equipment may need to change based on smaller more complex layouts.

Emergency Procedures

"Shelter-in-Place" Procedures

If an incident occurs and the buildings or areas around you become unstable, or if the air outdoors becomes dangerous due to toxic or irritating substances, it is usually safer to stay indoors, because leaving the area may expose you to that danger. Thus, to "shelter-in-place" means to make a shelter of the building that you are in, and with a few adjustments this location can be made even safer and more comfortable until it is safe to go outside.

Basic "Shelter-in-Place" Guidance

If an incident occurs and the building you are in is not damaged, stay inside the building in an interior room until you are told it is safe to come out. If your building is damaged, take your personal belongings (purse, wallet, Cougar card, etc.) and follow the evacuation procedures for your building (close your door, proceed to the nearest exit, and use the stairs instead of the elevators). Once you have evacuated, seek shelter at the nearest College building quickly. If police or fire department personnel are on the scene, follow their directions.

How You Will Know to "Shelter-in-Place"

A shelter-in-place notification may come from several sources, including the College of Charleston Department of Public Safety, Emergency Management Team, Housing Staff members, other College employees, Charleston Police Department, or other authorities utilizing the College's emergency communications tools.

How to "Shelter-in-Place"

No matter where you are, the basic steps of shelter-in-place will remain the same. Should the need ever
